

Straumann – Committed to simply doing more for dental professionals

Headquartered in Basel, Switzerland, Straumann is a global leader in implant and restorative dentistry and oral tissue regeneration. In collaboration with leading clinics, research institutes and universities, Straumann researches, develops and manufactures dental implants, instruments, prosthetics and tissue regeneration products for use in tooth replacement and restoration solutions or to prevent tooth loss. Straumann products and services are available in more than 70 countries.

The Straumann® Dental Implant System

With its roots in Swiss precision engineering and clinical excellence, the Straumann® Dental Implant System is renowned for its exceptional quality and reliability. It is one of the most extensively scientifically documented implant systems in the world, comprising surgical implants and prosthetic components that connect the implant with the crown of the replacement tooth. The Straumann® Dental Implant System is complemented by a range of matching precision instruments and handling components. Every item is designed for easy handling, crafted to the highest quality standards, ensuring long-term safety and reliability.

Restorative and regenerative solutions

Straumann offers state-of-the-art computer-guided surgery, intra-oral scanning, and CAD/CAM prosthetics to specialists, general dentists and dental laboratories in various markets around the world. Straumann is the only leading solution provider in implant, restorative and regenerative dentistry to offer all these services. Straumann CAD/CAM dental prosthetics are manufactured to very high precision standards in centralized milling units, processing a broad range of materials including super-esthetic glass ceramics. To complement its implant system and prosthetic solutions, Straumann manufactures products that are used to regenerate oral tissue, either to support implant procedures or to help preserve teeth after treatment for periodontal disease.

Research, development and education

For more than half a century, Straumann has been driven by research and innovation. Having taken a pioneering role in implantology, the company today is a leading global contributor to R&D in its fields.

Straumann is also renowned for its outstanding role in education and provides state-of-the-art training for dental professionals in more than 70 countries.

In education and research, Straumann works closely with the International Team for Implantology (ITI), an independent international network of eminent clinicians and researchers from leading clinics, research institutes and universities around the world.
