- ≡ Multicenter study 1-year results¹ show exceptional survival rates, despite >40% of implants being placed in poor quality bone
 - immediate loading = 98% survival
 - early loading = 97% survival
 - bone gain seen with 16% of implants
- ≡ Head to head study² shows enhanced osseointegration and secondary stability compared with a main competitor
- ≡ Clinical confirmation of dramatic bone defect filling³
- ≡ Well on track to reach penetration target of 30% despite lack of availability in large Asian market

2008 guidance confirmed

(barring unforeseen circumstances)

On the basis of the underlying performance in the first half and the expected contributions from new products, technologies and subsidiaries, Straumann expects 2008 full-year **revenue** growth to be in the **low to mid twenties range in local currencies**.

As efficiency improvements are expected to exceed the higher levels of amortization related to acquisitions, the Group foresees an improvement of around **50 basis points in full-year operating margin calculated with constant (2008) currency rates**. Accounting for the normalized tax rate and the current strength of the Swiss franc, the **net profit margin is expected to be around 22%**.
