

Aesthetic Risk Assessment Table

This checklist is used to evaluate preoperative risk assessment for optimal esthetic outcomes during implant therapy in the esthetic zone.

For further information on how to use this table, please refer to ITI Treatment Guide Vol.10*

This is an interactive document. Click on the topic status to highlight it as low, medium, or high.

Esthetic risk factor	Low	Medium	High
Medical Status			
Smoking Habit			
Gingival display at full display			
Width of edentulous span			
Shape of tooth crowns			
Restorative status of neighboring teeth			
Gingival phenotype			
Infection at implant site			
Soft-tissue anatomy			
Bone level at adjacent teeth			
Facial bone-wall phenotype*			
Bone anatomy of alveolar crest			
Patient's esthetic expectations			

*If three-dimensional imaging is available with tooth in place

1 Standard-diameter implant, regular connection

2 Narrow-diameter implant, narrow connection

* This Checklist is taken from: W. Martin, V. Chappuis, D. Morton, D. Buser. Preoperative risk assessment and treatment planning for optimal esthetic outcomes. ITI Treatment Guide, Vol. 10: Chapter 3; Pg. 30. Quintessence Publishing: Berlin; 2017
