International Team
for Implantology

“Joining the ITI is a MUST for any lab technician looking to be a contributing part of the dental team. The networking opportunities and the access to research backed implant education are invaluable tools that will set them apart from their peers.”

- Charles Banh, CDT, ITI Fellow
Tigard, OR

“The ITI has been an amazing organization to be a part of as it has opened the doors to incredible educational opportunities to learn alongside clinicians and gain a deeper understanding of the challenges of implant dentistry. For myself, learning in a team environment has provided me deeper comprehension of the role I can play as a dental technician to assist in more optimal patient care. It is an honor to be a Fellow of the International Team for Implantology whose goal is lifelong research and education for the advancement of implant dentistry.”

- Brandon Dickerman, CDT, ITI Fellow
Sharon, MA

“The ITI membership exposed me to a world of information. By using the ITI website, attending lectures, study clubs, workshops, national/international ITI meetings and friendships with other ITI members, I have been able to keep up with my profession. Within the ITI, there are many ways in where a dental technician can advance his or her career. After all, we and the dentists are partners and share a common goal. A happy patient with a happy smile.”

- Andreas Radics, CDT, ITI Fellow
Boston, MA

“Studying together - teaching together! Together in modern dentistry. For me, there is no question the ITI is the best base for clinicians and technicians.”

- Alexander Wünsche CDT, ZT; ITI Fellow
Miami, FL

“In today’s world, digital technology makes it necessary for us to have a higher level of knowledge. We must continually be learning...and if we learn together, we will grow together. Joining the ITI solidifies the Team Approach to learning, offering Dental Technicians access to educational courses in every specialty of Dentistry including Dental laboratory technology.”

Marisaa Notturmo, DT
New York City, NY

“We are welcoming the dental technician community into the fold of the ITI to make us an even stronger world-wide organization. The ITI Treatment Guides, ITI Study Clubs, On-Line Academy, ITI Dental Implant Research grants along with our National Congresses/World Symposiums and comradery all separate the ITI from other organizations in dentistry. The personal and professional growth that one gets with ITI involvement is a game changer.”

- Robert A. Levine DDS; ITI Fellow-1998;
Chair of US ITI Membership/Fellowship, Periodontist
Philadelphia, PA

“The ITI is an incredible group where I have met wonderful friends who are passionate about dentistry and growth as a clinician. Where else can you find general dentists, periodontists, prosthodontists, oral surgeons, & lab technicians, all in one place, all wanting to “raise the bar” to build a better ITI community. I started as a lab technician in dentistry which has provided a unique perspective on the importance of inter-disciplinary solutions in implant dentistry. We are searching for quality lab technicians to become an integral part of our ITI TEAM.”

- Bryan Harris DMD, ITI Fellow, Prosthodontist
Louisville, KY
