

# Perform – Transform – Together

## Senior Product Development Engineer (m/f/x) with Group Leading Function

Medentika® has become synonymous with the successful development of high-quality products in dental implantology. With a determined, dynamic team, we have been meeting the challenges of this rapidly growing market for over 15 years. Our products are continuously, innovatively developed, manufactured in Calw, Germany and sold to more than 50 markets worldwide.

The world is growing together, we are all connected and you are in the center of it.

"Knowledge and experience are not enough. If you want to make a difference, you need passion."

We are looking for you as our new Senior Product Development Engineer (m/f/x). In this role you will be part of an inspired and dynamic team, shaping together the future of our advanced and innovative Medentika prosthetic and implant portfolio. You will be leading a team of two experienced people. The position is based in Hügelsheim, Germany and reports to the Head R&D.

### Your tasks

- Lead a team of two experienced colleagues and ensure the compliance of the technical documentation and that the tasks are fulfilled and aligned with the Medentika quality management processes and roadmap.
- Overall technical lead on demanding, cross-functional development projects under consideration of design control process
- Translation of user needs/market inputs into technical specifications
- Evaluation of technical solutions and performance of feasibility studies
- Coordination of verification and validation-activities (design output, verification & validation)
- Coordination of design transfer (production scale-up) activities
- Continuous technical product surveillance (products, components, processes).
- Evaluation, organization, coordination and implementation of product / process changes (improvements in quality / product usage & features, customer complaints, simplifications, cost reductions etc.)
- Technical lead in root cause investigations
- Ensure project documentation according to quality standards
- Enforce compliance to regulations and internal processes
- Leverage the network possibilities within the Straumann Group

## Your profile

- Degree in mechanical engineering, bioengineering, or related field of study
- Several years' experience in a related area such as development of medical device products
- Experience in dental industry is a plus
- Technical project lead in development projects
- Sound knowledge in applicable standards and regulations (MDD/MDR, FDA, ISO) and design control process
- Knowledge in the area of product development, manufacturing and testing, with specific development tools (e.g. FMEA, tolerance analysis, analysis of mechanical properties, statistical analysis)
- Previous experience in leading highly demanding product development projects is a plus
- Audit experience with notified bodies and authorities
- Strong analytical skills and result orientation
- Distinctive interpersonal skills, customer focus and entrepreneurial thinking
- Effective and convincing communication, both verbally and in writing, fluent in English

## Who we're looking for?

**Agile Mindset.** This is about learning and adapting, continuously improving what we do to deliver a valuable product to our customers. You collaborate and communicate leading to team success

**Team player.** We love learning from each other, great ideas are shaped and inspired by other ideas in order to achieve the simplest, smartest and safest solution

**Innovative.** We create space for ideas and love to use the newest technologies. To be cutting edge, we need to stay on top and deliver an amazing digital experience

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, or disability.

**We look forward to your application!**
