

Straumann® Edentulous Solutions
Many reasons to smile.

For every edentulous patient

Straumann offers a solution

Treating edentulous patients often remains a challenge because of the expectations and clinical limitations involved. Your best option is a partner who will help you find the right solution.

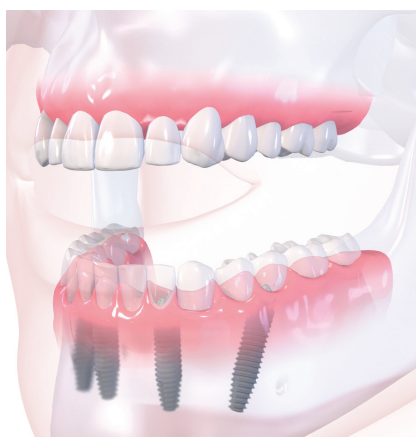

REMOVABLE		FIXED
		
Retentive Anchor	Novaloc®	Bar with pre-fabricated parts
		
Time-proven solution based on easy to handle ball-and-socket principle	Hybrid denture system available in 2 versions: straight abutments and angled to overcome high implant angulations	Allows bar constructions with the help of pre-fabricated bar copings and bar elements

FIXED RESTORATIONS

Telescopic construction

Straumann® Pro Arch

Fixed Bridge

Customizable, removable solution that feels as stable as a fixed restoration and is particularly easy to clean

Allows for immediate temporary restorations: Combination of Straumann® BLT Implant for enhanced primary stability with Screw-retained Abutment portfolio to overcome implant angulations

Fixed on the implants with screws and can be removed for professional cleaning in the dental office
