Straumann® Edentulous Solutions

Because we are all unique.

STRAUMANN® REMOVABLE EDENTULOUS SOLUTIONS

Straumann® Novaloc® Retentive

Long-lasting, yet cost efficient restoration with excellent wear resistance and compensation of up to 60° implant divergence.

STRAUMANN® FIXED EDENTULOUS SOLUTIONS

Straumann® Pro Arch with BLT and BLX systems

Tailored immediate solutions on four to six implants with a highly esthetic prosthetic outcome. Straumann tapered implants are designed to provide primary stability[1] and optional implant tilting to avoid extensive bone grafting.

Straumann® TL and BL implant systems

Reliable restorations with the Straumann TL implant - one of the most best documented implants on the market. Screw-retained solution with the BL implant system.

straumann®

Tailored to fit. Additional tools and services for the immediate full-arch restoration

PLAN

Treatment planning with coDiagnostiX®

coDiagnostiX®, a digital implant placement planning tool, enables you to plan full-arch cases cases precisely and easily. The tool offers numerous measurement and planning functions, including automatic nerve canal detection, various distance monitoring functions as well as designing surgical and bone resection guides.

PRODUCE

Straumann® CARES® Digital Solutions

Connect carefully selected, efficient dental equipment with the latest digital technology and premium materials to provide a seamless, open and fully validated digital workflow for dental professionals. Fully orchestrating the digital dental industry leaders.

DELIVER

Smile in a Box service

Straumann® Smile in a box – a digital, modular, integrated treatment planning and manufacturing service. The clinician can select the services he or she wants, and Straumann delivers everything needed for the treatment in one box. Straumann® Smile in a Box makes the treatment planning simple and predictable with regard to time, costs and outcome.
