Flexibility and precision for a great performance.
Leverage the precise fit and the quality of the original Straumann connection.
Expand your options to leverage the quality of Straumann® screw-retained restorations. With flexibility and precision from a different angle.

Flexibility sets the stage for a great performance. The Angled Solution Systems combine angled screw channels and a best-in-class self-retaining screwdriver. They offer treatment options for a wide variety of indications in the anterior and posterior zone and give the choice for either a conventional or digital design.

Precision and attention to detail make the difference. We have refined the angled screw channel of the restoration to help achieve the best esthetic and functional outcome. No matter the implant, the screw channel can be tilted up by up to 25° in all directions. Yet its diameter has been designed as small as possible in order to leave more space for a restoration. The proven Straumann conical screw connection and insertion torque of 35 Ncm provide strong retentive power.

Discover the Angled Solutions and use a screw-retained approach where otherwise a cement-retained approach would have been the only choice.

What makes a great performance?

- **EASY TO USE**
  Straightforward workflow, easy handling

- **ESTHETIC**
  Up to 25° of screw channel angulation.
  Small screw channel diameter.

- **FLEXIBLE**
  All indications, platforms, digital and conventional
Sträumann® Angled Solution (AS) Systems

Easy to use
- One self-retaining screwdriver for all Sträumann® platforms
- Straightforward workflow with extra-oral cementation
- Simple access for revision procedures

Esthetic
- Screw channel angulation of up to 25° to allow for esthetic screw-retained restoration
- Small screw channel diameter in order to leave more space for restoration and reduce risk of chipping
Flexible
- Anterior and posterior indications
- Single-tooth, multi-unit restorations
- All tissue and bone level implant platforms
- Conventional or digital design workflow

Original
- Precise fit for your restoration with original Straumann connections
Straumann® Variobase® for Crown AS

New angles for uncompromised esthetics and easy access. The solution for single-tooth screw-retained restorations.

UNCOMPROMISED ESTHETICS
- Comparable with cement-retained restorations
- Retrievable prosthetics
- Flexible prosthetic-driven implant placement

EASY ACCESS AND IMPROVED FUNCTIONALITY
- Ideal position of screw-channel exit to achieve strength and longevity
- Easy access with angled screw channel tilted mesially for patients with restricted mouth opening
- Improved occlusal function

USE YOUR PREFERRED WORKFLOW
- Design the restoration using your preferred workflow, digital or conventional

burn-out coping
Using CARES® X-Stream™ you have a comprehensive and flexible prosthetic solution for restoring Straumann implants. The streamlined workflow will reduce the turnaround time and related costs considerably.
