

Let us put a smile
back on your face.

- Do you dread eating out with friends?
- Do you feel less confident due to poor teeth?
- Do you suffer from painful bleeding gums due to poorly fitting false teeth?

Same day implant placement and the use of a prosthetic tooth depends on many factors, including but not limited to, bone quality, the location of the missing or damaged tooth, your dental history and your general health. Consult with a dental professional to find out if dental implants and same day placement is right for you.

Embarrassed about your smile?

Losing teeth can have a huge negative impact on your quality of life. Conventional dentures are a solution, but they simply don't stay in place which can cause pain, bleeding and discomfort. Not to mention embarrassing situations.

Everyone deserves beautiful teeth. To be able to laugh and speak with confidence, and to eat what you like without discomfort. The dental implant solutions from Straumann help to restore your self-confidence and put a carefree smile back on your face again.

You are not alone.

More than 36 million Americans do not have any teeth
120 million Americans are missing at least one tooth

Can you imagine how wonderful it would be to have teeth that feel both natural and secure?

Now that's possible. With Straumann® Pro Arch there is no adhesive gel, no loss of taste sensation via your palate, and most importantly no more embarrassing moments. Just back to natural feeling teeth.

PERMANENT SOLUTION

Fixed teeth that are as secure as your natural teeth.

With this treatment option, natural-looking teeth can be permanently fixed to dental implants with tiny screws. Your dentist will only remove them periodically for cleaning and maintenance. In most cases, your dentist can place your new prosthesis on the day of the surgery, or shortly thereafter.*

* Immediate placement and function of fixed teeth depend on the primary stability of the placed implants and may not be possible in some of the cases.

REMOVABLE OPTION

Teeth you can
regularly remove
for cleaning.

With overdenture, your new teeth are attached to the implants using a secure, click-fix system.

You can choose to have implant-fixed teeth that you remove yourself for cleaning.

For a smile that lasts.

With Straumann® Pro Arch solutions you can eat, taste, laugh and speak naturally. Your new teeth will feel so natural you'll forget you're even wearing them.

Invest in yourself, because you deserve to feel confident, feel comfortable, and feel good again.

» You look in the mirror and realize you have an unbelievable smile, a smile you've longed for, for so long, and you not only have a beautiful smile but a functional smile. «

- Richard P. Shick (68)
