

Straumann® RidgeFit System

The Straumann® RidgeFit System secures your removable denture, with a snap-fit connection, on 4 implants in the lower jaw and 6 implants in the upper jaw. With this system, you may regularly remove the denture yourself for cleaning.

Compared to regular implant sizes, RidgeFit Implants are smaller in diameter and have the connection built in so you can insert and remove your denture on your own.

Treatment with RidgeFit is usually a minimally invasive procedure. Meaning you can already have your new teeth on the day of surgery. Also, with this treatment option, you may rebuild your existing denture and have fewer visits to the dentist, possibly reducing the overall costs.

With the Straumann® RidgeFit System you can restore your **quality of life**, talking, smiling, and laughing with your family and friends.

Things you should know:

If you have inadequate bone volume and/or quality, local root remnants, serious internal medical problems, uncontrolled bleeding disorders, inadequate wound healing capacity, not completed maxillary and mandibular growth, poor general state of health, uncooperative, unmotivated patient, drug or alcohol abuse, psychoses, pro-longed therapy-resistant functional disorders, xerostomia, weakened immune system, illnesses requiring periodic use of steroids, uncontrollable endocrine disorders, bruxism and other parafunctional habits, these conditions might present a risk for you. Consult your clinician to find out if dental implants are right for you.

The possibility of a minimally invasive procedure and receiving your new teeth on the day of surgery depends on many factors, such as bone presence and quality, dental history, implant location, and implant stability. Your clinician will fully describe the possible scenarios to you during consultation prior to surgery.

Embarrassed about your smile?

Losing teeth can have a negative impact on your quality of life. Conventional dentures are a solution, but they may not stay in place which can cause pain, bleeding and discomfort. Not to mention embarrassing situations.

Everyone deserves beautiful teeth. To be able to laugh and speak with confidence, and to eat what you like without discomfort. The dental implant solutions from Straumann help to restore your self-confidence and put a carefree smile back on your face.

Everyone deserves beautiful teeth

To be able to laugh, speak, and eat with confidence, Straumann provides a wide range of treatment options for people missing teeth. The RidgeFit Implant System is one of these options, helping to restore your self-confidence and put a carefree smile back on your face again.

AFFORDABILITY

Reduced costs due to fewer parts and pieces, as well as potentially less visits due to the possibility of converting your existing denture for use with RidgeFit.

HIGH DURABILITY

The Optiloc® fixation system is designed to resist wear and be low in maintenance.

TEETH THE SAME DAY

With the Straumann® RidgeFit Implant System, bone augmentation procedures may be avoided so you can leave the office with dentures on the day of surgery* or shortly afterwards.

* Immediate fixation of the denture depends on the outcome of the implant placement procedure and may not be possible in all cases.
