More than efficient.
X-Streamly time-saving.

Straumann® CARES® X-Stream™

straumann
simply doing more
WHAT IS CARES® X-STREAM™?
CARES® X-Stream™ is a highly efficient CAD/CAM workflow that allows you to gain time by creating both, the abutment and the corresponding restoration (crown, bridge or over-denture) in a single streamlined process. Design the restoration first and let the software design what’s beneath it. Both parts are then milled simultaneously and shipped in one package.

YOUR BENEFITS

- **Efficiency**: You want to step up the productivity and efficiency of your business? Save up to 50% of the steps compared to conventional CAD/CAM processing.

- **Precision**: Fed up with checking the fit? Our validated milling center creates the right fit for you.

- **Flexibility**: Monolithic or framework? You choose the abutments, materials and techniques that match your professional needs.

- **Connectivity**: No Straumann scanner? Use one of our partner systems or benefit from the CARES® Scan & Shape service.

- **Quality**: The Straumann® original connection ensures a perfect fit with Straumann implants.

---

1 The CARES® Scan & Shape service may not be available in your country, please check with your local sales representative for further information.
Product overview

MATERIALS

3M™ ESPE™ Lava™ Plus
Outstanding esthetics with true colors and a plus in translucency

zerion®
Low translucent zirconium-dioxide for highly stable frameworks

IPS e.max® CAD
All ceramic restorations for efficient esthetics

coron®
Cobalt-chrome frameworks: Veneering process comparable to noble casting alloys

ticon®
Highly reliable and precise titanium frameworks

polycon® ae²
Full-contour temporary PMMA restorations for high efficiency

ABUTMENTS

CARES® Abutment, ceramic (ZrO₂)
For highly esthetic & customized single and multi-tooth restorations

CARES® Abutment, titanium
For customized single and multi-tooth restorations

Variobase® for crown
For efficient single-tooth restorations

Variobase® for bridge/bar
For efficient multi-tooth restorations

Variobase® coping for bridge/bar
For efficient multi-tooth restorations on screw-retained abutments

2 Can be used in combination with all abutments (for single- and multi-tooth restorations)
CARES® Abutment, ceramic (ZrO₂)
- Highly esthetic: Ideal for thin biotype
- Very soft-tissue friendly
- Control over cementable line
- Individual shape and angulation
- Patient-specific emergence profile

CARES® Abutment, titanium
- Control over cementable line
- Individual shape and angulation
- Patient-specific emergence profile

Variobase® for crown
- High restorative flexibility

MONOLITHIC RESTORATIONS
Save time – minimal processing necessary
Avoid failure – reduced risk of chipping

VENEERED RESTORATIONS
Create masterpieces – highly esthetic results
Be flexible – large choice of materials

Ceramic  Metal

 Straumann® CARES® X-Stream™ for single crowns

Save time – minimal processing necessary
Avoid failure – reduced risk of chipping

Create masterpieces – highly esthetic results
Be flexible – large choice of materials

Ceramic  Metal
**Variobase® for bridge/bar**
- High restorative flexibility

**CARES® Abutment, ceramic (ZrO₂)**
- Highly esthetic: Ideal for thin biotype
- Very soft-tissue friendly
- Control over cementable line
- Individual shape and angulation
- Patient-specific emergence profile

**CARES® Abutment, titanium**
- Control over cementable line
- Individual shape and angulation
- Patient-specific emergence profile

**VENEERED RESTORATIONS**
Create masterpieces – highly esthetic results
Be flexible – large choice of materials

**MONOLITHIC RESTORATIONS**
Save time – minimal processing necessary
Avoid failure – reduced risk of chipping

**CERAMIC**
**Metal**
