

# STRAUMANN® CARES® DIGITAL SOLUTIONS

CARES® Implant Prosthetics  
Ultimate restorative flexibility.

# Customized restorations of exceptional quality from one trusted partner.

## PERFORMANCE

Reached through best-in-class digital equipment, technologies, materials, services and knowhow.

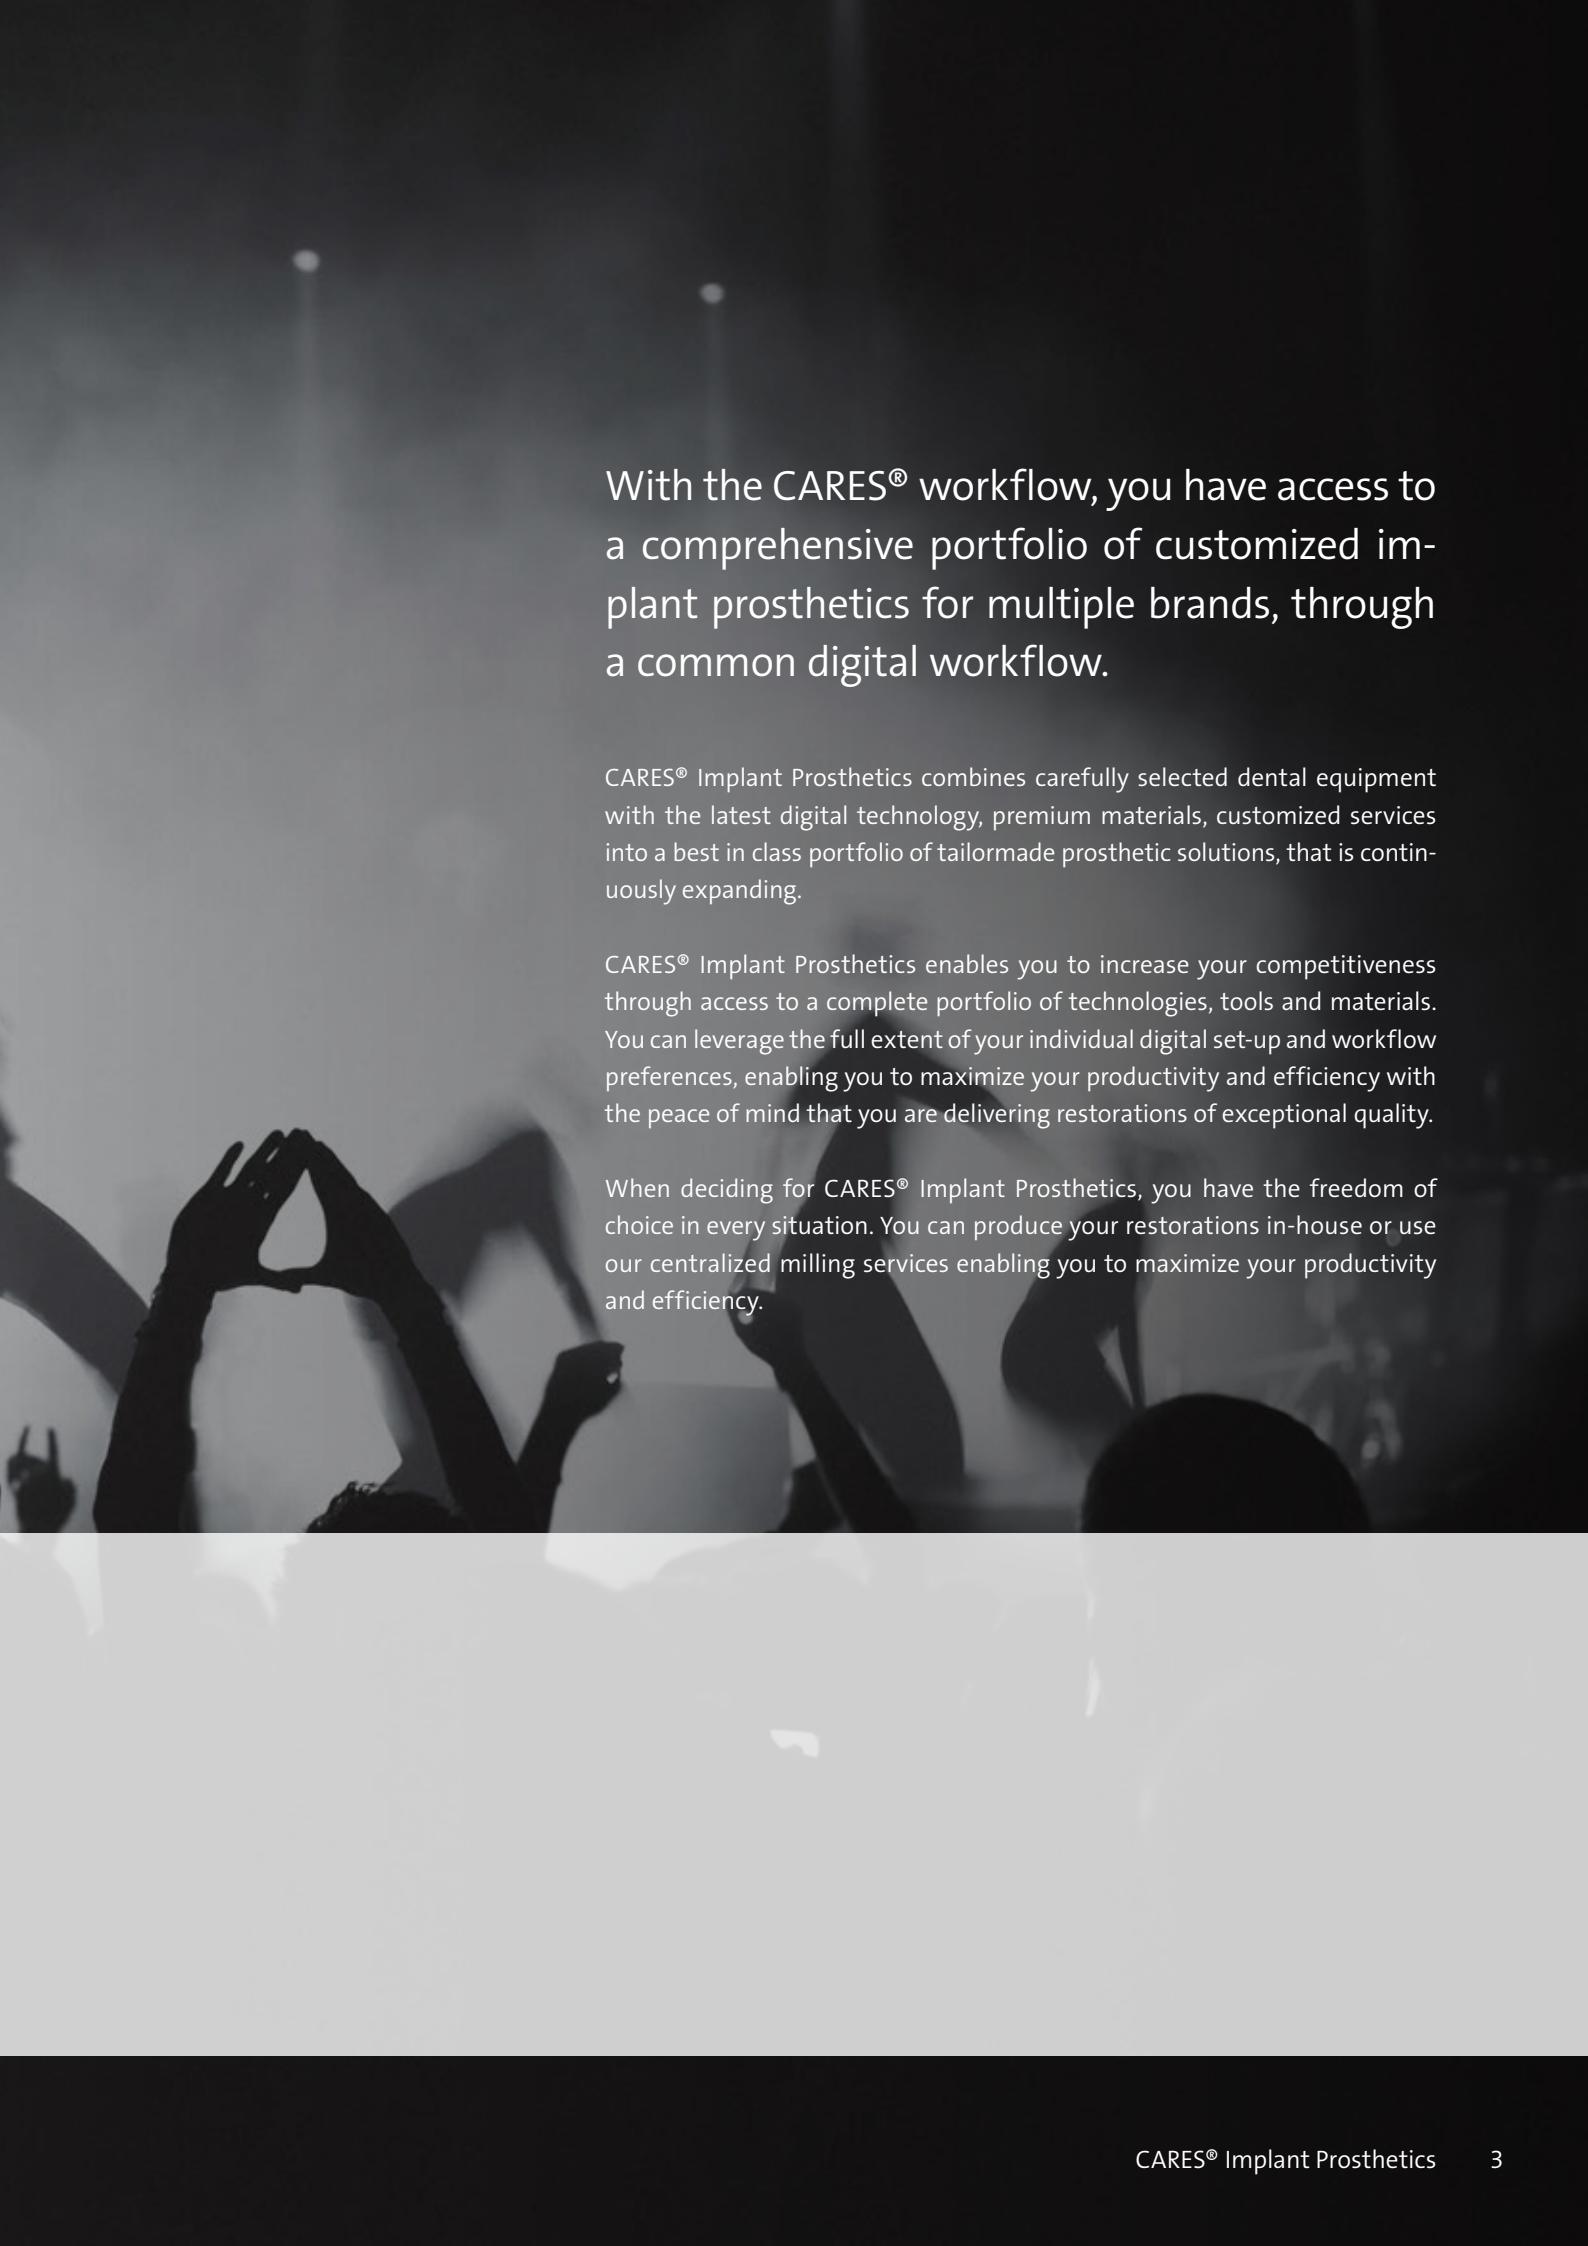

## FLEXIBILITY

A comprehensive portfolio of restorative options and a variety of workflows.

## SIMPLICITY

The one-stop-shop for all your CADCAM restorative needs for multiple implant brands.

With the CARES® workflow, you have access to a comprehensive portfolio of customized implant prosthetics for multiple brands, through a common digital workflow.

CARES® Implant Prosthetics combines carefully selected dental equipment with the latest digital technology, premium materials, customized services into a best in class portfolio of tailor-made prosthetic solutions, that is continuously expanding.

CARES® Implant Prosthetics enables you to increase your competitiveness through access to a complete portfolio of technologies, tools and materials. You can leverage the full extent of your individual digital set-up and workflow preferences, enabling you to maximize your productivity and efficiency with the peace of mind that you are delivering restorations of exceptional quality.

When deciding for CARES® Implant Prosthetics, you have the freedom of choice in every situation. You can produce your restorations in-house or use our centralized milling services enabling you to maximize your productivity and efficiency.

# A portfolio to outperform your expectations.

CARES® Implant Prosthetics deliver high performance through a unique combination of best-in-class digital equipment, technologies, materials, and services.

With CARES® Implant Prosthetics you benefit from decades of research, development and experience that Straumann® and its partner companies, such as Createch, a pioneer in the field of screw retained bars and bridges, have built into their innovative products and solutions.

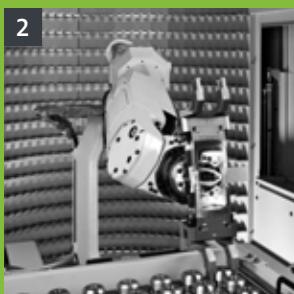

## CARES® IMPLANT PROSTHETICS WORKFLOW STRICTLY CONTROLLED MANUFACTURING PROCESS

Order → Production → Quality Control → Delivery

From scan to design.

State-of-the-art milling machines utilizing high-speed cutting (HSC) milling technology.

Thorough finishing and quality control of all parts.

A seamless workflow until delivery to your office door.

Experience the combination of excellence in design engineering together with unrivalled precision manufacturing from our CARES® centralized production facilities. It all starts with the careful selection of raw materials, each component is manufactured under strictly controlled conditions, including a meticulous quality control process to guarantee the highest standards. We are determined in our commitment to providing customers and patients with reliability, quality and peace of mind.

# Lean on a comprehensive CADCAM portfolio.

No matter if you restore a straightforward single unit or a complex full arch rehabilitation, CARES® Implant Prosthetics is always the right choice when it comes to best-in-class tailor made restorative solutions for virtually any indication.

## FOR IN HOUSE MILLING

## CARES® X-Stream™

### Maximize efficiency

Minimize turnaround time and costs by having your abutment and the corresponding, excellent fitting coping or crowns manufactured and delivered together. One scan, one design, one delivery from one source.

For your crown and bridge prosthetics, you have the flexibility to select from a set of cement- and screw- retained solutions. For your edentulous cases you can opt from a broad range of removable or fixed solutions.

## CENTRALIZED MILLING SERVICES

## Angled screw-channel solutions

### Uncompromised esthetics and functionality

Ensures that for your screw-retained restorations, the position of the screw exit hole is always in the perfect occlusal position, even if implants are placed in an unfavorable position.\*

\*not available for all indications in all markets

# Flexible workflows for unlimited freedom.

Access a comprehensive portfolio of customized implant prosthetics through your preferred workflow. Whatever your level of equipment, CARES® will assist you in enhancing your individual lab set-up.

Be it a scan, a design or a complete production, you can let Straumann® do the whole prosthetic work for you or only transfer single steps to us and do the remaining work yourself. If you prefer producing your restorations on your own, we offer all the components you need to create best-in-class CADCAM implant prosthetics. The choice is yours.
