

Carames Advanced Education Center

TARGET AUDIENCE

GPs, Specialist and Lab Technicians

DATES

July 14 – 15, 2023

November 24 – 25, 2023

COURSE FEE

€1,850

REASONS TO ATTEND:

The Carames classification was designed to enable personalized treatment of edentulous patients, considering each individual's expectations, clinical situation, and financial capabilities. Patient-specific treatment protocols are based on the vast experience and anatomic classification developed by Prof. João Caramês.

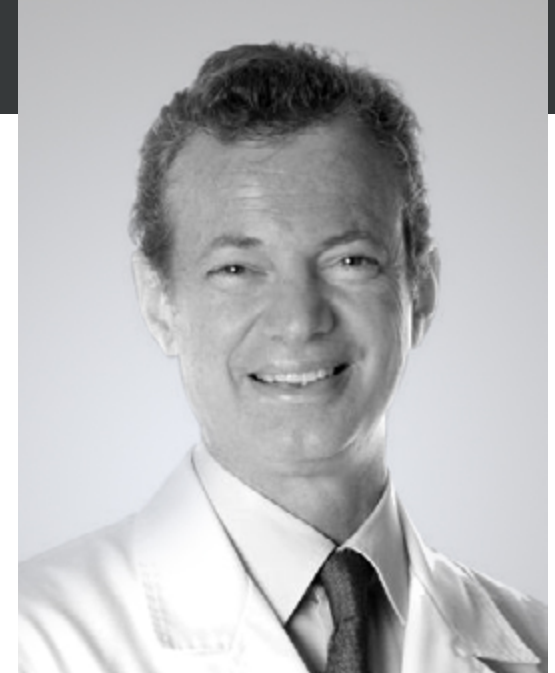

COURSE OVERVIEW

Treatment planning, from analogic to digital and decision-making strategies needed to consider several factors such as patient selection, implant distribution, number of implants, implant type, rehabilitation design and soft tissue management.

The 1.5-day program will include discussions about modern technologies, surgical and prosthetic techniques, same day immediate loading and clinical evidence in the field of immediate full arch restorations.

TOPICS

- Full Arch
